Vote cards: A, B, C

One set per person. Cut along the dashed lines. Use for pick-a-card (10:00) and the KBC vote (14:25).

A

One agent

KBC vote: CSOB fronts everything

B

Planner + Executor

KBC vote: KBC runs a central gateway

C

Several agents

KBC vote: chained, KBC baseline and CSOB enforces

Pattern cards: P, O, E, N

One set per person. Use for the pattern poll (12:00).

P **Planner-Executor**	**O** **Orchestrator-Worker**
E **Event-driven tree**	**N** **None of these**

Sort cards

One set of eight per pair. Cut along the dashed lines. Place each card in a zone on the A3 mat.

1

Calculating a customer's early repayment charge

2

Summarising a customer complaint for a case handler

3

Deciding whether a payment is over the customer's limit

4

Drafting the reply to a customer complaint

5

Deciding whether a customer is in financial hardship

6

Picking which policy document answers a staff question

7

Telling a customer what the refund policy says (incident card 2)

8

Deleting records from a production database to fix a data problem (incident card 1)

Sort mat (print at A3, one per pair)

CODE or POLICY ENGINE a rule decides	MODEL, inside guardrails with review and a visible source	HUMAN with the model at most informing

Cards you cannot decide go on a line between two zones. Write on a sticky why.

Workshop role cards

One set per group. Swap roles at 15:35.

Architect

You hold the pen. Draw the boxes and the arrows. Keep the sketch readable from two metres away. You do not decide alone: ask the Sceptic before you commit a design choice.

Boundary marker

At every arrow, write three things: the identity presented, what that identity can do, and the layer that decides (agent, gateway or AI firewall, policy engine). If the honest answer is "the agent", write it down. It is a finding.

Sceptic

At every arrow ask "what stops it?". Write down at least three challenges. You do not have to solve them. You are allowed to be unconvinced.

Scribe

Keep the one-page worksheet and the list of open questions. Write down the name of the weakest hand-off the group agrees on. You will photograph the sketch at the end.

Incident reader

Hold the two incident cards for the table. At 15:45, test the design against each card: would this design have stopped it, and which line on the sketch shows that? If your group has only four people, the Scribe does this.
