ACTIVITY 2

The rules banks already work under

Illustrative, not legal advice. Dates and scope need confirming with CSOB compliance before anyone relies on them.

Rule	What it asks of an agent	Status and date
GDPR	Is there a lawful basis for each use of personal data? Have people been told? Who is the processor? Where does the data go, and for how long is it kept?	In force
DORA	Who are the ICT third-party providers (model provider, platform, tool servers)? Are they in the register of information? How are incidents reported?	Applies from 17 January 2025. Register of information: Article 28(3)
Czech cybersecurity act (No. 264/2025)	Implements NIS2. Security measures and incident reporting for covered entities, including the systems the agent depends on.	In force from 1 November 2025
EU AI Act	What class is the system in: prohibited, high-risk, transparency duties only, or minimal? What follows from that?	Prohibitions from 2 February 2025. Most transparency duties (Article 50) from 2 August 2026. High-risk obligations moved by the AI Omnibus, Regulation (EU) 2026/1744, in force from 27 July 2026: stand-alone systems (Annex III) to 2 December 2027, product-embedded (Annex I) to 2 August 2028

Your task. For each of the four cards (Samsung, the Garante decision, Air Canada, postmark-mcp), tick every rule it would have touched on the next sheet, write one line on why, and write the role of the first person at CSOB who would have been asked.
