ACTIVITY 4

Which risk class?

Work in pairs. Silently classify each system with a sticky note on the wall chart (prohibited, high-risk, transparency duties only, minimal). Put a question mark on any you are unsure about. Illustrative only: CSOB's legal and compliance function makes the real call.

#	System	What it does	Your class	What fact would settle it?
1	**The mortgage pre-screening assistant (Day 1)**	Suggests whether an applicant is likely to qualify for a mortgage.		
2	**The compliance policy copilot (Day 1)**	Staff ask questions about internal policy and get answers with sources.		
3	**The Day 3 tabletop agent**	Answers customers about mortgage products, updates contact preferences and books callbacks.		
4	**A loan servicing triage agent**	Sorts customers who may be in financial difficulty into queues for human follow-up.		
5	**A card transaction agent**	Flags suspected fraud on card transactions for a person to review.		

Closing sticky: what we would need to know about our own system to classify it.
